

**STAPLEE Evaluation**

A critical component of selecting mitigation goals, objectives (measures) and strategies to reduce to the community’s risk of hazards is ensuring the criteria are consistent with and complementary to other community programs.

The following table provides an analysis of the area’s proposed mitigation actions. Each action was reviewed according to the **S**ocial, **T**echnical, **A**dministrative, **P**olitical, **L**egal, **E**conomic and **E**nvironmental (STAPLEE) criteria. An “X” under the appropriate column indicates the action would play a factor in mitigation actions. No “X” in a box indicates this area is not foreseen to be impacted.
